WITH KKC®**

**KKC**®  
of Norway 

**KKC** is function, ergonomics and aesthetics all in a single rifle stock. Behind every KKC is advanced technology, excellent craftsmanship, passion and enthusiasm.

## The story behind **KCC**

KCC is the result of Kjetil Kverndokk's college dissertation project from The Institute of Industrial Design at The Oslo School of Architecture and Design in Norway, from January 1998.

KCC was ranked as the top task and one of the best through the school's history. In 1999, KCC received honourable mention in The Norwegian Design Council's Young Talent Competition.

After having received numerous requests to manufacture and market his product, Kverndokk decided to initiate commercial production of his rifle stock in the Spring of 2003. Two years later, in 2005, the first stocks were ready for delivery. Sales have increased in line with good feedback from highly satisfied customers.

The entrepreneurial process has not been painless, but Kverndokk have been able to turn the challenges and exploit to positive development of the product.

The first years he sanded, stained and mounted the stocks himself. Today an advanced line of production is established inhouse in Kverndokks native city Ålesund in Norway but he is still personally involved in the production.

I now see big opportunities to develop the concept of KCC and to create new ones, says Kverndokk, suggesting the fact that he has several new design ideas.

# KKC advantages

## 01 Superior balance. Ergonomic grip - you quickly achieve a correct and good grip.

- You have never experienced anything like it.
- A quick, correct and comfortable grip leaves a precise shot.
- You have a natural and relaxed angle in your wrist while sitting on post or stalking.
- You are alert and ready.

## 02 Designed for shooting with optics/scope

## 03 4 point full support - hands, shoulder and cheek

## 04 Adjustable cheek piece in height and angle

- Get a full picture through your optics the second you lift your rifle – right on your target!
- Find the angle of your cheek bone for optimal recoil comfort.
- The comb can be adjusted back and forth to secure perfect support in all shooting positions.
- Memory function, you can remove the comb to remove the bolt or reinstall it. Snap the comb back on and your previous settings are the same.

## 05 Adjustable recoil pad in height and length – make it fit you

## 06 Hex key in sling swivel – to operate the adjustments

## 07 Wide wedge shaped forend

- You gain a good, steady and comfortable grip regardless of where on the forend you hold and you hold back the recoil tilt easier.
- The shape of the forend also gives you a good grip in the balanced position while carrying the rifle by one hand.

## KKC material features

- Durable
- Stable – does not twist and bend when exposed to moist and temperature changes.
- Absorbs recoil and vibration.
- Stiff enough to lean the rifle on a bipod.
- Allows an ergonomic design to have low weight.
- Through dyed wood and oiled finish - easy maintenance and repair.
- Can be drilled, screwed and glued.
- Visually unique.

**UPGRADE  
YOUR  
RIFLE**

WITH KKC®**

## KKC Hunting

LOP adjustable from about 34,5 to 36,1 cm.  
Extra KKC spacer set available (2x0,8 cm).  
NB! The trigger will be different for every rifle.

## KKC Short

LOP adjustable from about 32 to 33,6 cm.  
Extra KKC Spacer set available (2x0,8 cm).  
NB! The trigger will be different for every rifle.

Slimmer forend.

## KKC DuoGrip

KKC DuoGrip® combines the best of two worlds by offering both thumbhole and regular grip in the same stock! This gives you several advantages compared to a conventional thumbhole stock such as perfect grip in any shooting position, easy access to the safety without letting go of the grip and a faster follow up shot once reloaded as you are not forced to go back into the thumbhole.

DuoGrip® weight starts at approx.. 1 kg depending on which action it is milled for.

LOP (length of pull) is adjustable from 33,9-35,5 cm. Additional spacer set is available with 2 spacers that increases

LOP with 0.8 cm each up to a maximum LOP of 37,1 cm. DuoGrip® is a bit shorter than Hunting and has a slimmer forend. The rear stock is higher which makes for an even more straight recoil increasing the already exceptional long range capabilities.

The all new cheek piece system E-flex® with adjustable height and angle even let you adjust the comb back and forth to secure maximum cheek support in any position. The tool-less design also gives you the advantage to release the comb to remove and reinstall the bolt without changing the height and angle settings.

KKC has a variety of colors to choose from. The laminate is colored all way through so if you need to refinish your stock you will get the same color and finish afterwards.

**KKC Black**

## Accessories

### KKC E-flex cheek pieces

**Medium** – right and left.

**Medium cut** – right and left.  
Cut out section for longer bolts.

**Low** – right and left.

**High** – right.

### KKC E-flex

**E-flex base complete**  
Can be used for right and left.

### KKC Multi oil

For maintenance and polishing of all wood parts and metal components.

### KKC Stock oil

For durable treatment of wood.

### KKC PBS Hex key

Push Button Swivel with Hex Key, cup and screw.

### KKC Spacer set

Two 8mm spacers and longer screw.

# Accessories

## KKC Generation 1 cheek pieces

**Medium** – right.

**Medium** – left.

**Medium cut** – right.  
Cut out section for longer bolts.

**Medium cut** – left.  
Cut out section for longer bolts.

**High** – right.
